APPLICATION OF TARIFF

This tariff provides for the application of pricing programs other than full Class Rates on two-line haul interline shipments handled by ODFL joint-line with certain interline (or partner) carriers when no pricing is published to specifically apply joint-line with such carriers. Provisions of this tariff apply: (1) between points in the 48 contiguous United States and, (2) between points in the 48 contiguous United States on the one hand, and points in Canada on the other hand.

Unless otherwise provided in this tariff, the Class Exception or Freight, All kinds Rates referred to in this tariff will be those published and currently effective in ODFL 559/555, ODFL 505 and ODFL 560. If pricing published by ODFL provides for application of LTL rates in the most current issue and currently effective Czarlite tariff or Class Rate tariffs published by other carriers or Bureaus that are the most current issue and currently effective for general application by those other carriers or Bureaus, those LTL rates will also apply in connection with provisions of this tariff.

Rates in Czarlite tariffs or Class Rate tariffs published by other carriers or Bureaus that are not the most current issue and currently effective for general application by those carriers or Bureaus (“old rates”) may not be used in applying the provisions of this tariff. In lieu of such “old rates”, the currently effective LTL rates in tariffs ODFL 559/555, ODFL 505, and ODFL 560 will be used in applying provisions of this tariff.

Percentage discounts referred to in this tariff will not apply in connection with class rates subject to minimum weights of 20,000 lbs or more.

Provisions of this tariff apply only when the pricing is to be reflected on the freight bill.
