

TARIFF ODFL 100-G

RULES AND OPTIONAL SERVICES

ITEM 153

ACCESSORIAL SERVICES AND CHARGES -- NON-APPLICATION

When any publication governed by this tariff exempts or cancels the application of charges for any of the accessorial services provided by this tariff, the carrier is not obligated to perform the services for which the exempted or cancelled charges would have applied.

ITEM 170

APPLICATION OF CLASSES AND/OR RATES - INADVERTENCE CLAUSES

1. When rates in tariffs published by ODFL or NMFC ratings are subject to a released valuation being stated on the bill of lading and the shipper fails or declines to indicate an acceptable valuation on the bill of lading at the time of shipment, the shipment will be considered as being released to the lowest valuation provided and the shipment will be transported and charged for subject to such limitation of such liability. This part applies only when released valuation is required in order to determine a rate and does not apply when the shipper has the option to release or not to release a shipment as to value.
 2. When bills of lading are prepared by the shipper for shipments handled by ODFL, the complete information required to be shown on the bill of lading by the bill of lading contract and Item 360 of the NMFC must be shown on the bill of lading, including the complete description of all the articles in the shipment. These provisions apply also when the applicable pricing consists of a rate or rating applicable on "Freight, All Kinds". If the bill of lading contains a commodity description of "Freight, All Kinds" or "FAK" or other such wording, other than a complete description of the articles shipped, or a description that is not complete enough to enable the carrier to accurately determine the applicable Class Rating provided in the governing Classification, the shipment will be subject to a minimum charge based on the applicable Class 100 rate less the applicable percentage discount. If the shipment is subject to rates other than Class rates, the minimum charge will be determined by applying the applicable Class 100 rate less a 55% discount.
